

Vakgroep organische chemie

J. L. van der Baan and F. Bickelhaupt

Anion formation versus nitrile ketenimine tautomerism in alkylidene malononitriles and cyanoacetates. *Tetrahedron*, 31, 1545 (1975).

J. L. van der Baan and F. Bickelhaupt

Model experiments on the construction of the ABE ring system of hetisine type diterpene alkaloids. *Rec. Trav. Chim. Pays-Bas*, 94, 109 (1975).

C. Blomberg

Magnesium, Annual survey covering the year 1973. *J. Organometal. Chem.*, 95, (1975), pp. 139-200.

C. Blomberg and F. A. Hartog

Mechanistic aspects of the Barbier-Grignard synthesis. Abstracts of papers of the VIIIth international conference on organometallic chemistry (1-5 september 1975), No. 54.

H. W. H. J. Bodewitz, C. Blomberg and F. Bickelhaupt

The formation of Grignard compounds. III. The influence of the solvent. *Tetrahedron*, 31, (1975), p. 1053.

H. W. H. J. Bodewitz, C. Blomberg and F. Bickelhaupt

The formation of Grignard compounds. IV. Direct proof for the formation of RMgX as primary product in the reaction of organic halides with magnesium. *Tetrahedron Letters*, (1975), p. 2003.

H. W. H. J. Bodewitz

The formation of Grignard compounds. A mechanistic study. *Dissertatie V.U.*, 1975.

E. Boerhorst, R. F. Schmitz and G. W. Klumpp

Alkyl bromide - organolithium interactions of isomeric 7-methoxy-2-norbornyl systems. Large rate effects by intramolecular coordination. *Tetrahedron Letters*, (1975), p. 3347.

P. A. Bolhuis, O. S. Akkerman and J. M. Los

Formation of a bridged aza compound in the chemiluminescent reaction between 9,10-diphenylanthracene cations and n-butylamine. *J. Chem. Soc. Chem. Comm.*, (1974), p. 870.

H. Bos and G. W. Klumpp

The protonation of „snoutene” (pentacyclo[4.4.0.0^{2,4}.0^{3,8}.0^{5,7}]dec-9-ene). *Tetrahedron Letters*, (1974), p. 3641.

H. J. Eggelte

Synthese en eigenschappen van 1,4-dithiocinderivaten. *Dissertatie V.U.*, 1975.

G. Ellen and G. W. Klumpp

Solvolysis of exo-tetracyclo[4.4.0.0^{2,4}.0^{3,9}]dec-10-yl derivatives; an extremely reactive trishomocyclopropenyl system. *Tetrahedron Letters*, (1974), p. 2995.
