

W. J. Teunissen, Dr. J. W. Copius Peereboom en Dr. P. Bos

Zie: Instituut voor milieuvraagstukken.

Dr. N. H. Velthorst

Chemical education in the Netherlands; Chapter in: Chemical education in Europe; London, The chemical society, (1977), pp. 139-158.

Dr. J. C. Verhoef

Mechanism and reaction rate of the Karl Fischer titration reaction; proefschrift V.U., Amsterdam (1977).

The potentiostaat; principe en constructie; in: polytechn. tschr. - proces techniek 32 (1977), p. 402.

Drs. J. C. Verhoef en Prof. E. Barendrecht

Mechanism and reaction rate of the Karl Fischer titration reaction, part II: Rotating ring-disk electrode measurements; in: J. Electroanal. Chem. 75 (1977), p. 705.

Dr. H. W. Vos, Prof. dr. ir. C. MacLean en Dr. N. H. Velthorst

The structure of indolyl alkali-metal ion pairs in the ground state and the first excited state; in: Journal Chemical Society, Faraday Transactions II, 73 (1976), pp. 327-339.

G. de Vries en Dr. U. A. Th. Brinkman

The use of plastic foil in small-scale thin-layer chromatography; in: Journal of Chromatography, 134 (1977), pp. 235-237.

Vakgroep anorganische en theoretische chemie

Prof. dr. D. E. Ellis, Dr. E. J. Baerends, Dr. H. Adachi, Dr. F. W. Averill

Molecular cluster theory of CO chemisorption on a nickel (100) surface; in: Surface Science 64 (1977), pp. 649-669.

Dr. H. B. Jansen, Prof. P. Pyykkö

Calculation of the bromine nuclear pseudoquadrupole coupling constant in the LiBr molecule using a density-of-states function deduced from overlap Integrals; in: Quantum Science, Methods and Structure, editors Calais, Goscinski, Linderberg and Öhrn, Plenum 1976.

Drs. J. G. Snijders, Dr. E. J. Baerends

A non-parametrized pseudopotential scheme adapted to the Hartree-Fock-Slater model; in: Mol. Phys. 33 (1977), pp. 1651-1662.

Dr. T. Ziegler, Dr. A. Rauk, Dr. E. J. Baerends

On the Calculation of multiplet energies by the Hartree-Fock-Slater method; in: Theoret. Chim. Acta (Berl.), 43 (1976), pp. 261-271.
