

10-10-84 W. Bronsveld	Glucose-insulin-potassium in endotoxic shock
12-10-84 P.A. Nieuwmeyer	Polyneuropatische aspecten van de verlamming van Bell
24-10-84 Mw. E.H.A. Poll	Fanconi Anaemia: sensitivity of its cells to DNA - crosslinking agents
2-11-84 G.J.J. Teule	Noninvasive detection of intravascular pooling in experimental septic shock
9-11-84 C. Nieboer	Immunohistochemical studies of the skin
16-11-84 J. Lindeboom	The blind and the mute
30-11-84 C. de Putter	Per mucosal Dental Implants of the Dense Hydroxylapatite
11- 1-85 F.C. Visser	Scintigraphy with Radioiodinated Free Fatty Acids
23- 1-85 W.M. Blanken	Purification and characterization of galactosyltransferases involved in the biosynthesis of glycoconjugates
25- 1-85 H.J. Porck	Genetic and biochemical studies on human transcobalamin II
1- 2-85 J. Defize	Genetic heterogeneity of pepsinogen biochemical and physiological aspects
22- 3-85 J.W. Vredevel	Somatosensory evoked potentials (median nerve stimulation) in acute stroke.
1- 5-85 R.D. van der Gaag	Immunoglobulins affecting thyroid growth
10- 5-85 G.J. van den Horn	Interaction of heart and arterial system
24- 5-85 Mw. C. Popp-Snijders	W3 Polyunsaturated fatty acids and erythrocyte membranes
